

BASIC INFORMATION

Company name:	ECCOS inženjering d.o.o.
Founded:	1992 in Zagreb
Headquarters:	I Pile 21, 10 000 Zagreb
VAT Number:	0324035
Business code:	74200

The company **ECCOS inženjering** has built its reputation on engineering and implementation of technical security systems, cost - effective measurement and control systems applied in the industry, energy production, transport, financial institutions, building management and automation systems.

ECCOS inženjering staff consists of carefully selected employees (26 at the moment), mostly graduated engineers (14 at the moment), young but already with previous extensive experience in engineering, project development and management of complex projects, acquired in some of the biggest Croatian companies.

Activities

■ Technical security systems

- Access control, Time & attendance
- Fire alarm systems, gas detection
- Intruder alarm systems
- CCTV security surveillance systems & Central surveillance systems
- Perimeter protection
- Manguard security systems
- Mechanical protection systems (barriers, revolving doors, turnstiles)
- Security systems tailored to customer's individual requirements

■ Enterprise energy management systems & Power quality monitoring systems

- Engineering, design, implementation and maintenance of Enterprise Energy Management Systems
- ION metering and control devices, software equipment
- Intelligent systems for measurement and management
- Monitoring operations and important parameters (gas, steam, water...)
- Real time information

■ Instrumentation and control systems & Industrial and building automation systems

- Measurement - management systems based on programmable logical controllers and SCADA Software packages
- Implementation of SW solutions and applications , completely designed and developed by our engineers
- Secondary equipment (instrumentation, power supply, protection)

Partners

Turnkey security systems, Access control systems, Door systems, Key systems

Electronic ticketing solutions (Fairs, Stadiums, SKI resorts), Advanced parking systems

Enterprise data collection: Access control, Time&Attendance, SAP communication solutions

Anti - burglar, Intrusion and Fire detection systems

Mechanical security systems: Automatic security revolving doors, Barriers, Turnstiles

Enterprise energy management systems, Power quality analysis, Energy cost control

Large safes (all sizes), Customer bank-safe systems

Radar based tank gauging and liquid management

Tracking video motion detection systems

Visualization software (SCADA) for Industrial automation based on OPC standards

CCVE Systems, Advanced security solution ideas

Wireless transmission of audio, video, control and data signals

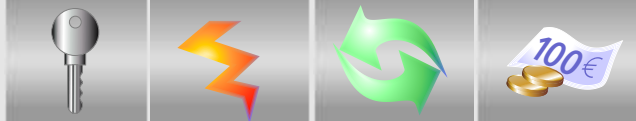

Sophisticated CCTV security surveillance equipment, digital video recorders

Security systems for special purposes
