

ORGMAN

A safe path to successful business

CMMS

WHAT IS ORGMAN?

The effective managing of maintenance of a large number of technical systems and quality advanced documentation of maintenance activities necessarily requires the implementation of the Computerized Maintenance Management System (CMMS). ORGMAN is a computerized maintenance management system developed by ECCOS. Fully customizable to suit individual user needs, ORGMAN, as an integrated system of the maintenance process automation, is a type of management software that performs functions in support of management and tracking of operations and maintenance activities. It allows users to accomplish their maintenance practices more effectively while introducing time-saving features that lead to cost reduction.

WHY ORGMAN?

ORGMAN is an advanced system developed in accordance with cutting-edge technologies and trends in technology development, with the aim of improving the segments of security, automation and cost-effective resource management. Behind it stands the ECCOS team with many years of experience in designing, implementation and maintenance of complex projects and systems for various industries, building, financial institutions, energy and transportation.

WHAT DOES ORGMAN OFFER?

- Automated equipment maintenance
- Maintenance planning with automatic generation of orders
- Insight into maintenance indicators - KPI
- Maintenance cost tracking
- Submitting reports
- Certificate and license management
- Equipment condition monitoring lists
- Document management
- People and business directory
- Creating and sending polls by e-mail, result analysis
- Alarming and sending notification to users by e-mail
- Additional solutions or customization of existing solutions according to user needs
- Integration with other user systems (existing warehouse operations, etc.)

WHAT ARE THE ADVANTAGES OF THE ORGMAN COMPUTERIZED MAINTENANCE MANAGEMENT SYSTEM?

- Better use of resources
- Increased work safety
- Extended lifespan of machinery and equipment
- Optimization of stock and purchase of spare parts and materials
- Increased productivity
- Increased share of planned maintenance compared to corrective maintenance
- Gathering information for subsequent analysis and improvement of maintenance
- Prikupljanje informacija radi naknadne analize i unapređenja održavanja

HOW AND WHEN TO IMPLEMENT ORGMAN?

One of the main advantages of the ORGMAN computer system compared to other systems of this type is the possibility of its full customization to suit the needs and requirements of users. Prior to the implementation of the ORGMAN system, it is necessary to define which specific goals are to be achieved. Just as in the process analysis, implementation and customization of the ORGMAN system, the experienced and professional ECCOS team is at your disposal.
